

Railway Station

Railway is such a bigger network in the whole world that it's too difficult to maintain it before the introduction of PC in railway's, Computer along with networking or internet made it so easy to keep track of the information such as the number of train, the respective train name, number of seats in first, second and general class, the number of seats available on a particular date, what is the present status of a ticket using its PNR number, to book tickets form anywhere with the help of e- ticket and i-ticket introduced by the railways rather than to stand in a Q, the computer made the life easy for the Railways to keep the information about the traveler and loads on a fashionable and easy manner. Rather than to stand in a Q, the **computer** made the life easy for the **Railways** to keep the information about the traveler and loads on a fashionable and easy manner....The reason for computer is it take lotto book tickets and printer tickets and make online reservations...**Railway** is such a bigger network in the whole world that it's too difficult to maintain it before the introduction of PC in railway
