

A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as in two matrixes given below. The column and rows of matrix I are numbered from 0 to 4 and the column and rows of matrix II are numbered from 5 to 9. A letter from these matrixes can be represented first by its row and next by its column. 'O' can be represented by 30, 23, etc. and 'D' can be represented by 76, 88, etc. identify the set for the word 'POND'.

- (a) 00, 04, 67, 57 (b) 23, 12, 86, 69
(c) 43, 24, 98, 95 (d) 30, 42, 55, 87

(2) A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as in two matrixes given below. The column and rows of matrix I are numbered from 0 to 4 and the column and rows of matrix II are numbered from 5 to 9. A letter from these matrixes can be represented first by its row and next by its column. 'P' can be represented by 32, 44, etc. and 'U' can be represented by 76, 88, etc. identify the set for the word 'PALE'.

(5) In the question a word is represented by only one set of numbers as given in any of the alternatives. The set of numbers given in the alternatives are represented by two class of alphabets as in two matrices given below. The columns and row of Matrix I are numbered from 0 to 4 and that of Matrix II are numbered from 5 to 9. A letter from this matrices can be represented first by its Row and next by its column. For example 'k' can be written as 40,24 etc and 'Z' can be represented as 98,67 etc. You have to identify the set for 'OXEN'.

- (a) 21,55,22,02 (b) 56,12,87,22
(c) 23,45,12,22 (d) 11,02,32,65

(7) A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as shown in the given two matrices. The columns and rows of Matrix-I are numbered from 0 to 4 and that of Matrix-II are numbered from 5 to 9. A letter from these matrices can be represented first by its row and next by its column, for example, 'D' can be represented by 68, 95, etc., and 'P' can be represented by 75, 97, etc. Similarly, you have to identify the set for the word "BAND".

(21) A word is represented by only one set of numbers as given in any one of the alternatives. The set of numbers given in the alternatives are represented by two classes of alphabets as shown in the given two matrices. The columns and rows of Matrix-I are numbered from 0 to 4 and that of Matrix-II are numbered from 5 to 9. A letter of these matrices can be represented first by its row and second by its column. For example-K can be represented by 20,34 etc. And Z can be represented by 67,88 etc. Similarly, you have to identify the set for the word "PURE".
