A word is represented by only one set of numbers as given in any one of the alternatives. The sets of numbers given in the alternatives are represented by two classes of alphabets as in two matrixes given below. The column and rows of matrix I are numbered from 0 to 4 and the column and rows of matrix II are numbered from 5 to 9. A letter from these matrixes can be represented first by its row and next by its column. 'O' can be represented by 30, 23,etc. and 'D' can be represented by 76,88,etc. identify the set for the word 'POND'.

(a) 89,96,86,13 (b) 34,34,56,79 (c) 41,44,67,96 (d) 01,10,79,57 A word is represented by only one set of numbers as given in any one of the alternatives. The set of numbers given in the alternatives are represented by two classes of alphabets as shown in the given two matrices. The columns and rows of Matrix-I are numbered from 0 to 4 and that of Matrix-II are numbered from 5 to 9. A letter of these matrices can be SSC CGL 2017: Reasoning (Matrix Grid) www.onlinesetpractice.com Page 7 of 13 represented first by its row and second by its column. For example 'K' can be represented by 42, 34 etc. And 'Z' can be represented by 75, 86 etc. Similarly, you have to identify the set for the word "RUBY".
