

## Program on Print statement

### Program – 1

```
#include <stdio.h>           //This is needed to run printf() function.  
int main()  
{  
    printf("Hello World");    //displays the content inside quotation  
    return 0;  
}
```

#### Out Put Screen:

Hello World

---

---

### Program – 2

```
#include<stdio.h>  
int main()  
{  
    int c;  
    printf("Enter a number\n");  
    scanf("%d",&c);  
    printf("Number=%d",c);  
    return 0;  
}
```

**Out Put Screen:**

Enter a number

4

Number=4

---

---

**Program – 3**

```
#include <stdio.h>
int main(){
    char var1;
    printf("Enter character: ");
    scanf("%c",&var1);
    printf("You entered %c.\n",var1);
/* \n prints the next line(perform work of enter). */
    printf("ASCII value of %d",var1);
    return 0;
}
```

**Out Put Screen:**

Enter character:

g

103

---

---

\*\*\*
