

## Features of Digital Lecture Studio

### Upgraded level of Smart Classrooms

Blackboard and chalk had been replaced by Whiteboards and the time has come to upgrade the level of Smart Classroom and replace whiteboards by Digital Writing Pad and Pen. With this methodology one can overcome the disadvantages and limitations of the Whiteboard methodology or the Smart Classrooms.

### Portable

The DLS is easy-to-use methodology that can be taken from one classroom/training room to another or to a laboratory and even used in the fields. It is a well assorted methodology that involves a right mix of integrated hardware, software, content and technology.

### Create learning modules

Once you are through with the recording of lecture, you can package it by editing and removing unnecessary frames and integrating it with any other file that might make the lecture rich. Thereafter you can also make an online module of your lecture through the CMS.

### Effortless content creation

Teacher just has to teach without any technical involvement and the system automatically records the classroom experience and convert in to the lecture and makes it available for viewing many time, anytime, anywhere.

## Not just Teach – Give a *meaningful* approach to your teaching

Digital Classroom is a unique solution for knowledge/information transferring and capturing which provides complete teaching and learning solution. It is a methodology that is a way ahead of Smart Classroom and has been designed to overcome the drawbacks and fallouts of the Smart Classroom. In the Smart Classroom concept we did not have any facility to capture or record the classroom lecture. With the Digital Classroom technology you can not only broadcast your lecture live over the local or web based network but capture not only the lecture but the entire classroom experience. Furthermore

#### Hardware

- ▶ Podium
- ▶ Computer
- ▶ Projector
- ▶ Writing Pad
- ▶ Camera
- ▶ Microphone
