

SWITCHING BETWEEN APPLICATIONS USING YOUR KEYBOARD

You can easily switch between all running applications (programs) using only your keyboard. This is one Windows feature that can't even be done using the mouse! Here's how it works...

First, Press and hold down the ALT key

Now, tap the TAB key.

You will see a small window pop up with the icons for every running application.

Keep tapping the TAB key until the one you want is highlighted.

Now release the ALT key to switch to the highlighted application.
