Libraries

A modern library cannot be imagined without the application of computers. In the library and information centre's computers can be used for performing efficiently all sorts of jobs from the procurement of the reading materials to their organization and use. So, it can serve as a remedy for all the existing problems of libraries and information centre's.

Or

Libraries tend to use computers so that the people visiting can find books and determine if they are at their library location and where in the library it's located. They also have computers in libraries to provide those without access to the internet at home a place to do just that.

Computers have been used successfully in the following areas of library activities.

A) Library House Keeping Operation

B) Library Administrations

C) Information Retrieval

D) Building Digital / Virtual Libraries Collection

E) Resource Sharing

F) Library Network

G) Information System

H) User Services
