

## Natural Resources

Question: \_\_\_\_\_ resources are naturally found on the earth.

- a) natural
- b) artificial
- c) none of these

Answer: natural

Question: Carbon emission means \_\_\_\_\_

- a) release of carbon into the atmosphere
- b) none of these
- c) consumption of carbon from the atmosphere

Answer: release of carbon into the atmosphere

Question: \_\_\_\_\_ is the energy obtained from the Sun.

- a) solar energy
- b) chemical energy
- c) none of these

Answer: solar energy

Question: Fossil fuel is also known as

- a) non-renewable resources
- b) renewable resources
- c) none of these

Answer: non-renewable resources

Question: Petroleum is also known as crude oil.

- a) True
- b) False
- c) None of these

Answer: True

Question: Wind energy is the renewable source of energy.

- a) True
- b) False
- c) None of these

Answer: True

Question: \_\_\_\_\_ energy is used to rotate turbines in the barrage to

generate electricity.

- a) Tidal
- b) Solar
- c) Wind

Answer: Tidal

Question: 3R means

- a) Reduce, Reuse and Recycle
- b) Reperate, Reduce, Replicate
- c) none of these

Answer: Reduce, Reuse and Recycle

Question: \_\_\_\_\_ is electricity that is made by the movement of water.

- a) hydroelectricity
- b) solar electricity
- c) none of these

Answer: hydroelectricity

Question: Carbon emission in renewable energy resources is very

- a) low
- b) high
- c) none of these

Answer: low

Question: \_\_\_\_\_ energy is used in drying crops.

- a) biomass
- b) geothermal
- c) none of these

Answer: biomass

Question: \_\_\_\_\_ is used for sailing boats.

- a) tidal energy
- b) wind energy
- c) solar energy

Answer: tidal energy

Question: \_\_\_\_\_ are caused by the gravitational pull of the Sun and the Moon.

- a) waves
- b) floods
- c) tides

Answer: waves

Question: The largest source of energy for the generation of electricity world wide is

- a) coal
- b) Sun
- c) water

Answer: coal

Question: The ultimate source of energy for all living organisms is

- a) Sun
- b) Water
- c) wind

Answer: Sun

Question: \_\_\_\_\_ are built on rivers to produce electricity.

- a) Dams
- b) Bridges
- c) none of these

Answer: Dams

Question: All of these are called biomass

- a) animals and plant matter
- b) soil and plants
- c) hills and mountains

Answer: animals and plant matter

Question: \_\_\_\_\_ are also known as hydroelectric projects.

- a) Dams
- b) Bridges
- c) coal

Answer: Dams

Question: \_\_\_\_\_ supply more than 90 percent of the world current

energy requirements.

- a) Fossil fuels
- b) Sun
- c) Water

Answer: Fossil fuels

Question: Biogas is produced from

- a) animal dung
- b) water

c) sun

Answer: animal dung

Question: Return something to its earliest condition is called

a) replenish

b) change

c) interchange

Answer: replenish

Question: The process of heat processing a liquid or a food to kill

pathogenic bacteria to make the food safe to eat is called

a) boiling

b) drying

c) pasteurization

Answer: boiling
