

# Conditional and Control Flow Statements Used in Python

## 1. What is pass statement?

**Ans1-** Pass is also called Null statement. Where no value will be pass while executing.

**Ex-**

```
a = int(input("enter first value: "))
b = int(input("enter second value: "))
if (a==b):
    pass
else:
    print('Not Equal')
```

## 2. Difference if and if else statement in python with example?

**Ans2-**

If statement	If else statement
Statement will print in both cases either statement true or false.	Statement will print in both cases either statement true or false.
<b>Ex-</b> a = 56 b = 25 if (a>b): print('A is greater') Else: print('B is greater')	<b>Ex-</b> a = 56 b = 25 if (a>b): print('A is greater') Else: print('B is greater')

**3. Print first 10 natural number by using for loop.**

**Ans3-**

```
x=1
```

```
for x in range(10):
```

```
    print(x)
```
