

Introduction of Division

1. Divide by equal groups. Draw objects in boxes and write the division facts.

		$\square \div \square = \square$
		$\square \div \square = \square$
		$\square \div \square = \square$
		$\square \div \square = \square$

2. Through repeated subtraction, divide the objects equally in groups and write the division facts. One is done for you.

	<p>In group of 3</p> <table><tr><td>12</td><td>9</td><td>6</td><td>3</td></tr><tr><td>- 3</td><td>- 3</td><td>- 3</td><td>- 3</td></tr><tr><td style="border-top: 1px solid black;">9</td><td style="border-top: 1px solid black;">6</td><td style="border-top: 1px solid black;">3</td><td style="border-top: 1px solid black;">0</td></tr></table> <p>1 time 2 times 3 times 4 times</p>	12	9	6	3	- 3	- 3	- 3	- 3	9	6	3	0	<div><div></div> ÷ <div></div> = <div></div></div>
12	9	6	3											
- 3	- 3	- 3	- 3											
9	6	3	0											
	<p>In group of 2</p>	<div><div></div> ÷ <div></div> = <div></div></div>												
	<p>In group of 5</p>	<div><div></div> ÷ <div></div> = <div></div></div>												
	<p>In group of 4</p>	<div><div></div> ÷ <div></div> = <div></div></div>
