

## Standard Unit of Length

1. The standard unit of length is \_\_\_\_\_

2. Tick the correct answer

We use centimeter to measure

☐

(a) height of a tree

☐

(b) length of a pencil

☐

(c) distance between two cities

3. Fill in the blank

1 meter = \_\_\_\_\_ centimeters

4. The pencil is 12 \_\_\_\_ long (cm or m)

5. Ria's ribbon is 50 cm long. Her sister's ribbon is 1 m long

Who has the longer ribbon? \_\_\_\_\_

6. Write the correct unit

Length of your maths book = \_\_\_\_\_

7. A boy is 1 meter tall. A flag pole is 4 times taller

Height of pole = \_\_\_\_\_ meters

8. Draw a pencil and write its length in cm

9. Circle the standard units of length

(a) liter

☐

(b) meter

☐

(c) gram

☐

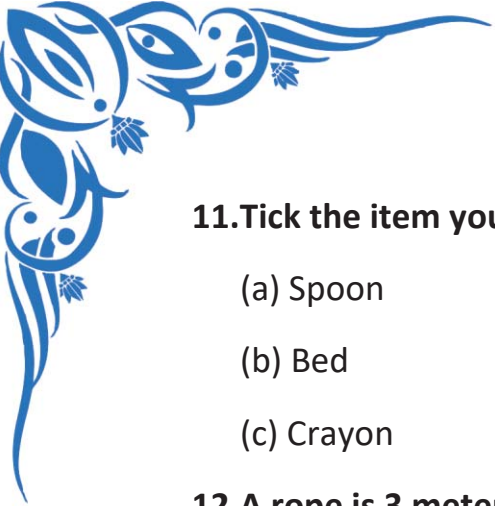

(d) centimeter

☐

10. Fill in the blanks

1 m = 100 \_\_\_\_

10 m = \_\_\_\_ cm

**11. Tick the item you would measure in meters**

(a) Spoon

☐

(b) Bed

☐

(c) Crayon

☐

**12. A rope is 3 meters long**

How many centimeters is it? \_\_\_\_\_

**13. Write true or false**

We measure a table's length in grams → \_\_\_\_\_

**14. Convert and fill**

200 cm = \_\_\_\_ m

300 cm = \_\_\_\_ m

**15. Which is longer?**

(a) 90 cm

☐

(b) 1 meter

☐

**16. A scale is 30 cm long.**

How many such scales make 1 meter? \_\_\_\_\_

**17. The rope is 250 cm long.**

How many meters and centimeters is it?

Answer: \_\_\_\_\_ m \_\_\_\_\_ cm
