

Division with Remainder

1. Divide to find the quotient and remainder.

a.

$$\begin{array}{r} \\ 2 \overline{) 11} \end{array}$$

Quotient is _____

Remainder is _____

b.

$$\begin{array}{r} \\ 4 \overline{) 29} \end{array}$$

Quotient is _____

Remainder is _____

c.

$$\begin{array}{r} \\ 5 \overline{) 526} \end{array}$$

Quotient is _____

Remainder is _____

d.

$$\begin{array}{r} \\ 4 \overline{) 85} \end{array}$$

Quotient is _____

Remainder is _____

e.

$$\begin{array}{r} \\ 7 \overline{) 936} \end{array}$$

Quotient is _____

Remainder is _____

f.

$$\begin{array}{r} \\ 3 \overline{) 47} \end{array}$$

Quotient is _____

Remainder is _____

g.

$$\begin{array}{r} \overline{) 27} \\ 2 \end{array}$$

Quotient is _____

Remainder is _____

h.

$$\begin{array}{r} \overline{) 337} \\ 6 \end{array}$$

Quotient is _____

Remainder is _____

i.

$$\begin{array}{r} \overline{) 469} \\ 8 \end{array}$$

Quotient is _____

Remainder is _____

j.

$$\begin{array}{r} \overline{) 89} \\ 5 \end{array}$$

Quotient is _____

Remainder is _____

k.

$$\begin{array}{r} \overline{) 13} \\ 6 \end{array}$$

Quotient is _____

Remainder is _____

l.

$$\begin{array}{r} \overline{) 107} \\ 3 \end{array}$$

Quotient is _____

Remainder is _____
