

## Activity to Shows Formation of Starch

### 1. Write True or False:-

A. Strach consists of one glucose polymers amyl pectin.

B. The primary of starch is to act as a reserve food supply for plants.

C. Starch is a polysaccharide made up of linkages between glucose tasteless Monomers.

D. Starch is a tasteless, fluffy white powder that is insoluble in cold water, Alcohol and other.

### 2. Fill in the blanks.

A. Plants store starch in \_\_\_\_\_ as granules.

B. Starch is made up of long chairs of \_\_\_\_\_ that are connected together.

C. The linear polymer \_\_\_\_\_ is the most basic form of starch.

D. \_\_\_\_\_ Amy pectin is the \_\_\_\_\_ form.

E. In an animal's diet, starch is a source of \_\_\_\_\_.

F. \_\_\_\_\_ and enzyme contained in saliva.

**3. Answer the following questions:**

A. How is starch formed in plants?

---

---

B. What is the formation of starch?

---

---

C. What is the simple form of starch?

---

---

D. What is the primary role of starch?

---

---

E. What two factors make starch formation?

---

---
