

# Food Preparation By The Plants

## 1. True or False:-

A. Animals are the only living things that prepare their food in the sunlight by wind, water, carbon dioxide and mineral.

B. The process in which the green leaves make their food is called photosynthesis.

C. Branches are the food factories of the plants.

D. In photosynthesis food is produced by utilizing water and oxygen in the absence of sunlight.

E. The part of the plant which produces its food is leaves.

## 2. Fill in the blanks.

A. \_\_\_\_\_ are the food factories of the plants.

B. \_\_\_\_\_ are the only living things that prepare their food in the sunlight by using water, carbon dioxide and minerals.

C. \_\_\_\_\_ gas is used by plants to prepare food.

D. Plants require \_\_\_\_\_, \_\_\_\_\_ and water to prepare their food.

**3. Answer the following questions:**

A. What is Photosynthesis?

---

---

B. How do plants produces their own food?

---

---

C. Who carries out the preparation of food?

---

---

D. Who absorbs water and minerals from the soil?

---

---

E. Who carries minerals and water to the leaves?

---

---

F. What is necessary for photosynthesis?

---

---
