

## Estimating Product

1. Estimate each of the following products to the nearest ten. Also, find the difference from the actual product.

a.  $13 \times 16$

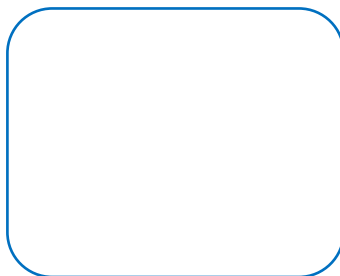

b.  $32 \times 28$

c.  $110 \times 15$

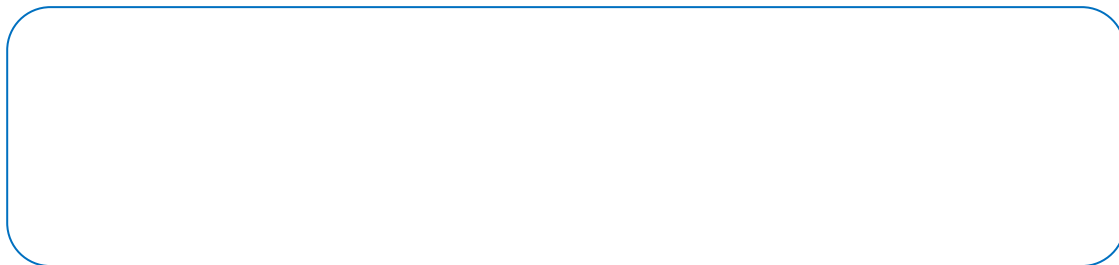

d.  $18 \times 27$

2. Use estimation and rounding to choose the appropriate answer for each problem.

- a. There are about 346 people in one train. Estimate the total number of peoples in 4 such trains.

- b. There were 265 kg flour in one bag and 322 kg flour in another bag. Estimate the difference in the quantity of flour in two bags.
