

## Nesting Habits of Birds

### A. Choose the correct answer :

1. Which bird uses leaves and twigs to build its nest?  
A) Penguin  
B) Sparrow  
C) Fish  
D) Rabbit
2. What do birds use to line their nests to make them soft?  
A) Stones  
B) Feathers and grass  
C) Plastic  
D) Sand
3. Which bird makes a hanging nest?  
A) Pigeon  
B) Crow  
C) Weaver bird  
D) Owl

### B. Fill in the Blanks:

1. Birds build nests to keep their \_\_\_\_\_ safe.
2. A weaver bird uses \_\_\_\_\_ and \_\_\_\_\_ to weave its nest.
3. \_\_\_\_\_ birds make their nests on the ground.

### C. Case Study:

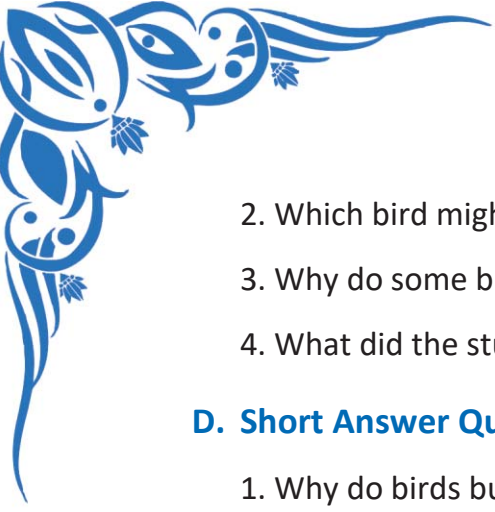

A group of students visited a bird sanctuary. They observed different types of bird nests:

- **Nest A:** Built on a tree with twigs and leaves, small and round in shape.
- **Nest B:** Made of mud, attached to a wall.
- **Nest C:** Hanging from a branch, woven with grass.

The students noticed that some birds were bringing food to their chicks, while others were still building their nests.

#### Case Study Questions:

1. What materials were used to build Nest A?

2. Which bird might have built Nest B, and why do you think so?
3. Why do some birds make hanging nests?
4. What did the students learn about bird nesting habits from their visit?

**D. Short Answer Questions:**

1. Why do birds build nests?
2. Name two materials birds use to make their nests.
3. Where do woodpeckers make their nests?

**E. Long Answer Questions:**

1. Describe the nesting habits of three different birds.
2. Why do birds choose safe places to build their nests?
3. How do birds protect their eggs and young ones in their nests?
