Biggest to Smallest (Descending Order)

Understanding the Topic

- Descending order means arranging numbers from the biggest to the smallest
- We start with the biggest number and go down to the smallest
- It helps children understand how numbers decrease in value
- Descending order is also called decreasing order
- We can use counting backward or a number line to help

How to Arrange in Descending Order

- **Step 1:** Look at all the numbers given
- **Step 2:** Find the biggest number
- **Step 3:** Then find the next biggest, and continue
- **Step 4:** Write the numbers from biggest to smallest

Examples with Solutions

Example 1

Arrange: 4, 2, 7

   Answer: 7, 4, 2

Example 2

Arrange: 9, 6, 3

   Answer: 9, 6, 3

Example 3

Arrange: 1, 5, 8

   Answer: 8, 5, 1

Example 4

Arrange: 10, 2, 6

   Answer: 10, 6, 2

Example 5

Arrange: 3, 7, 0

   Answer: 7, 3, 0

Summary Points

- Descending order means big to small

- We arrange numbers from the highest to the lowest

- Use counting backward to help with descending order

- Helps in understanding number comparison and order

- Practice makes it easy to spot the biggest and smallest numbers quickly
