

# Body Parts

## External Body Parts

As we all know our body has many parts. The parts that we can touch and see are called external body parts.

⇒ For Example → Hands, Legs, Eyes, Ear etc.

⇒ We all do a lot work from external body parts:

- A. We comb with hands.
- B. We listen with our ears.
- C. We see with our eyes.
- D. We walk with our legs.
- E. We smell with our nose.

# Body Parts

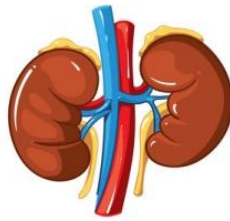

## Internal Body Parts

The body parts that are not visible and are inside our body are called internal body parts.

For Example → Heart, Kidney, Lungs etc.

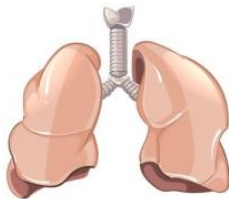

Brain

Kidney

Heart

Lungs

Liver

Stomach
