Time is used to quantify, measure, or compare the duration of events or the intervals between them, and even, sequence events.

We have to learn about the days of the week. There are seven days in a week they are **Sunday**, **Monday**, **Tuesday**, **Wednesday**, **Thursday**, **Friday** and **Saturday**. As the same way we have to learn about the months of the year so, there are 12 months in a year. These all topics help us to find out the time.
