

Addition on Number Line

Addition on the number line

What is a number line?

It is a line of numbers where we put numbers from 0 to 10 at equal distance.

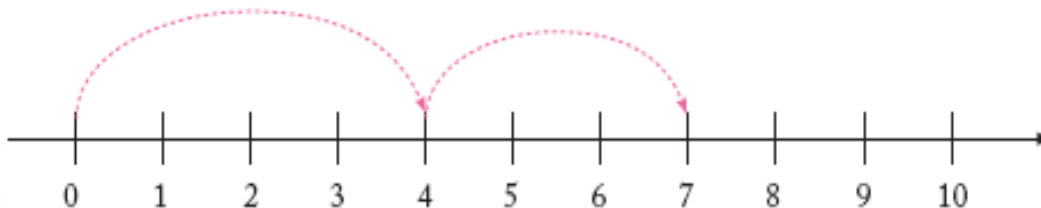

Let us learn to add two numbers on a number line. Look at the following pictures.

 Harsh has **4 candies**. Jai has **3 candies**. How many candies are there in all?

We can use the number line to find the total number of candies.

Start from 0 Count and jump to 4, then take 3 more jumps to reach 7.

So, there are $4 + 3 = 7$ candies.
