The Number Term

☞ **We have learnt about numbers from 1 to 9. Now, we will learn how to build a number 10.**

Let us understand the number 10.

⇨ **Example:**

There are 9 pencils on the table. The teacher puts 1 (one) more pencil there. How many pencils will be there now? Now, there will be 10 pencils.

9   and   1   make 10

10 ones make 1 tens.
