

Reading -4

Money is an important thing in the world. It can earn us respect also. People respect the person who is wealthy and powerful while nobody pays attention to a beggar. There are wise men and foolish men in the world. Money is safe in the hands of a wise man. If he gets wealth, he spends it wisely. He invests the money in profitable ventures that will bring him more money. Once a wise man gets wealthy, he stays wealthy. But it is different with a fool. If a foolish man gets wealthy, somehow or other, he spends it extravagantly without investing it profitably. Soon he will have spent all his money. Instead of utilizing the money he unwisely spends it all. This proves that money will not remain with a fool for long. Even if he doesn't spend too much, he is bound to make unwise investments which may make him lose his money.
