

Introduction of Measure of Weight

Measurement of Weight

The property of an object which tells us how heavy or light an object is called its weight.

We can clearly see that the weight of the lion is more than the monkey of Lion is heavier than monkey.

Units of Measurement of Weight

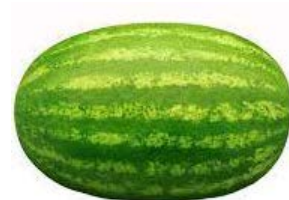

We use Grams and Kilograms to find out the weight of a particular things.

Gram

A gram is used to weight light objects it is written as **g**.

Kilogram

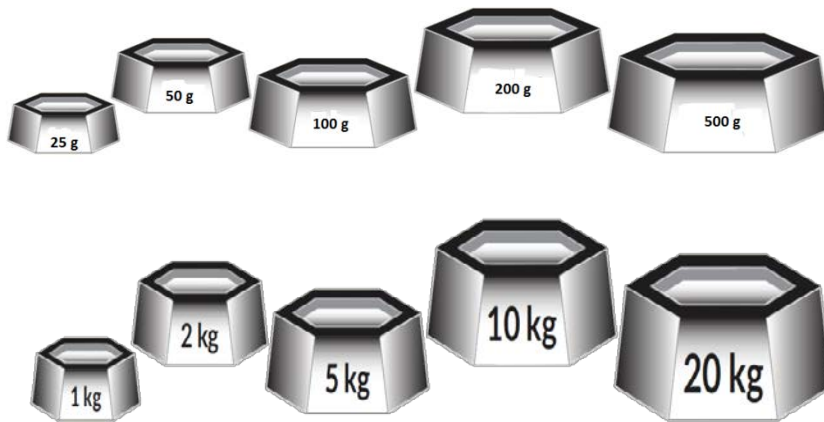

A Kilogram is used to measure heavy objects. It is written as **kg**.

Introduction of Measure of Weight

Weights of grams and kilograms are shown below:

Relation between Gram and Kilogram

If we put 1000 grams together, we get 1 kilograms.

So, **1 kg = 1000 grams**
