

Word Problems Based on Multiplication

Look at the examples to understand the multiplication based on word problem.

Example 1: Sonu sells 42 eggs every day. How many eggs does he sell in 5 days?

Solution: Number of eggs sold in one day = 42

Number of eggs sold in 5 days = 42×5

= 210

H	T	O
	1	
	4	2
	\times	5
2	1	0

Sonu sells 210 eggs in 5 days.

Example 2: A boy has 32 teeth. 4 boys will have how many teeth?

Solution: Number of teeth a boy has = 32

Number of teeth 4 boys have = 32×4

= 128

H	T	O
	3	2
	\times	4
1	2	8

4 boys will have 128 teeth.
