

Reading Calendar

Understanding the Topic

- A **calendar** shows **days, months, and dates**.
- It helps us know **today's date, day of the week, and month**.
- A **week** has **7 days** – Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.
- A **month** has **different number of days** (28, 30, or 31).
- We can find out special days like birthdays or holidays by looking at the calendar.

Why do we use a calendar?

- To check the date
- To know what day it is
- To remember festivals and holidays
- To count how many days are left for an event

Parts of a calendar

- **Month name** – tells which month it is (like January)
- **Days of the week** – Sun, Mon, Tue, Wed, Thu, Fri, Sat
- **Dates** – Numbers written under each day (1, 2, 3... up to 30 or 31)

Examples with Solutions

1. What day comes after Monday?

Answer: Tuesday comes after Monday.

2. Which day is the first day of the week?

Answer: Sunday is the first day of the week.

3. If today is 10 March, what is the month?

Answer: The month is March.

4. If your birthday is on 25 December, how do you find it on the calendar?

Answer: Look at the month December, then find number 25 under the correct day.

5. How many days are there in a week?

Answer: There are 7 days in a week.
