

14. A Proud Indian Class 4 English

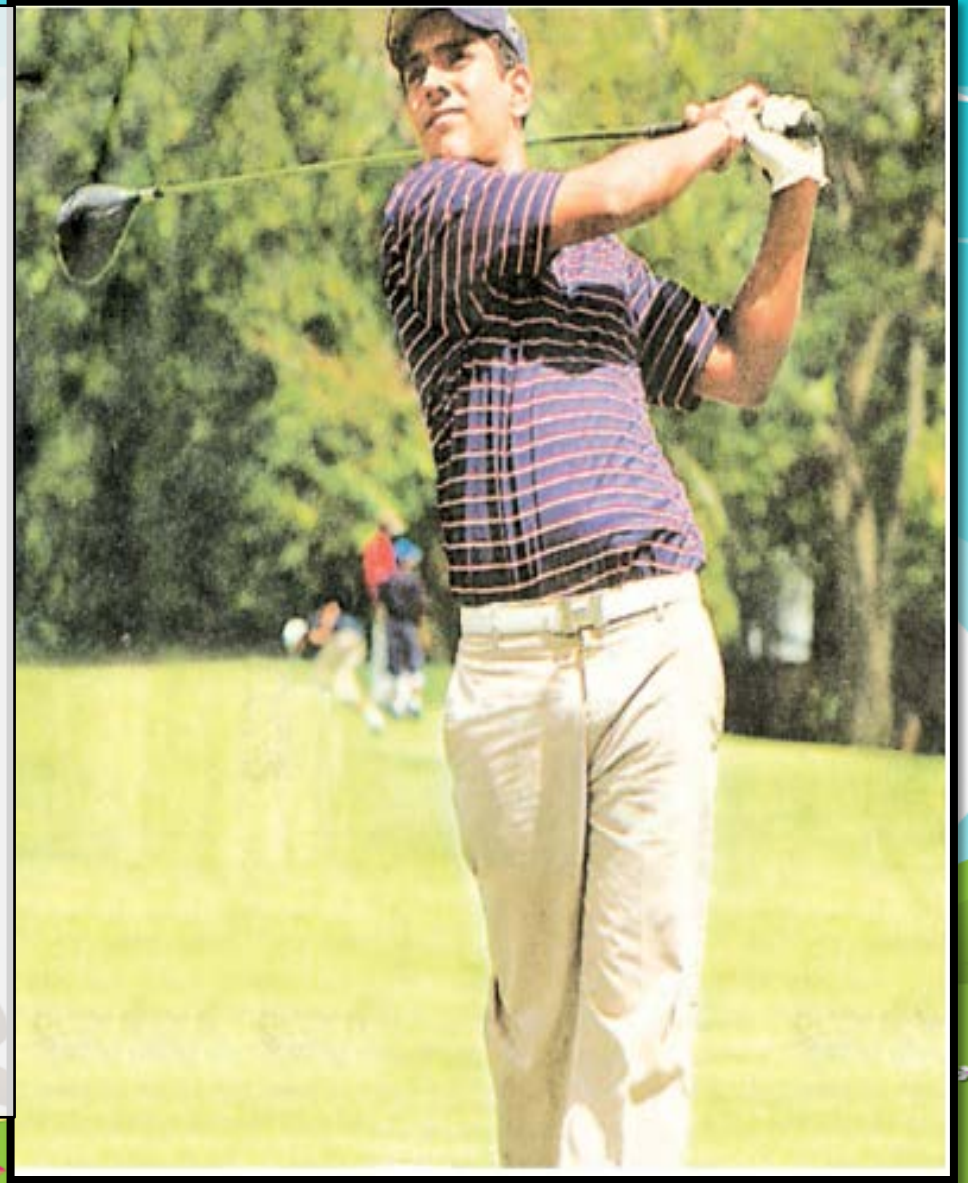

My golfing life started in 2001 when I played my first golf tournament, which was held at Delhi Golf Club. I did not go with the intention of bagging any position but came second in it. Interestingly, I did not possess a golf set of my own and played with a rented set. This was when I realised that I had the talent for golf. The following month, I played a national junior event at the age of 10 and came second in the under-10 category

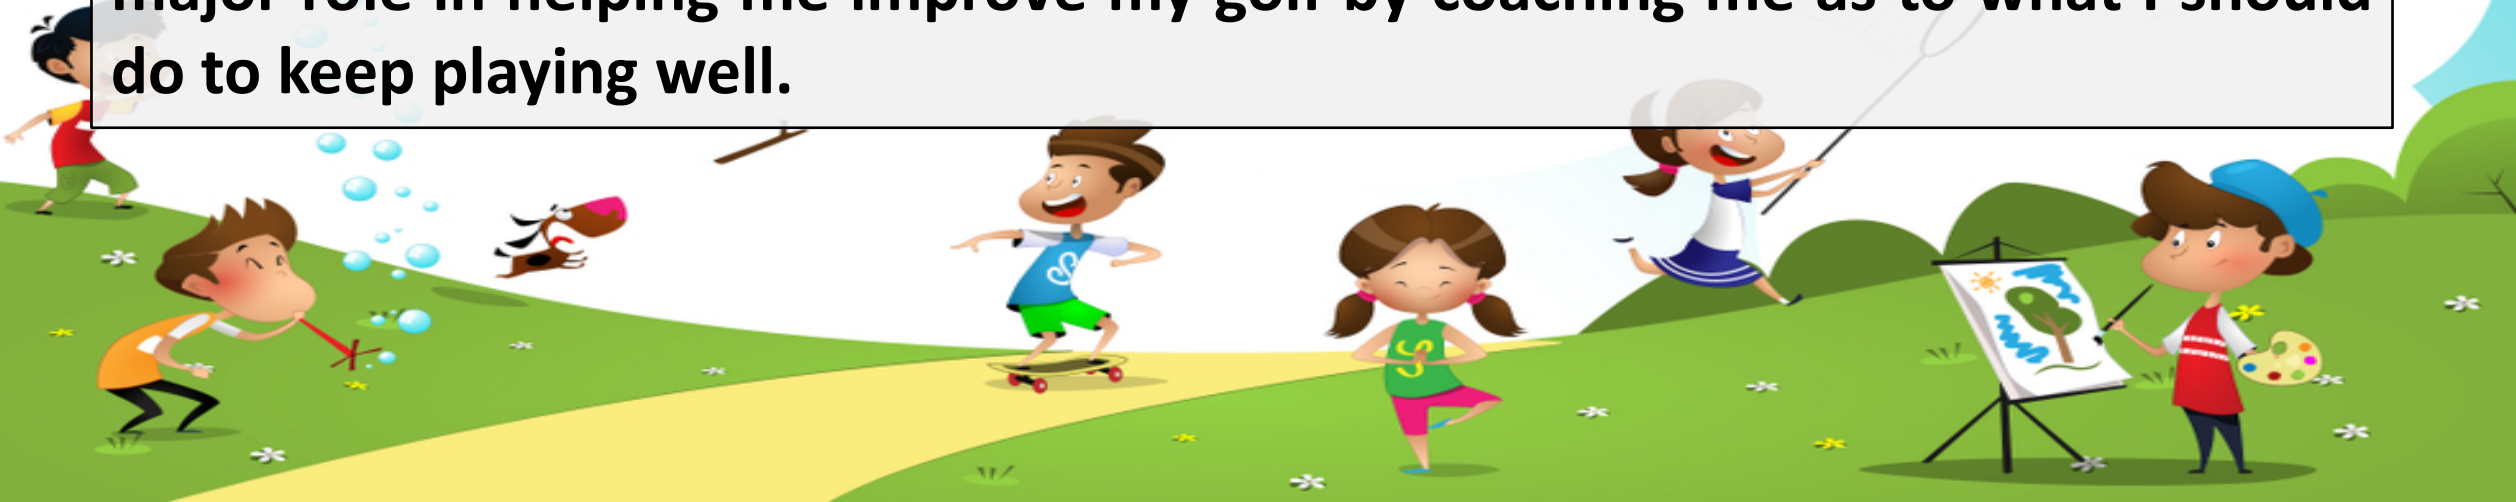

My real high in life came when I became the youngest ever winner of National Amateur Golf Championship of India at the age of 17 in January 2008. The very first tournament that I played in hinted that I had the potential to play well. Thus I took it up seriously along with my studies. Winning every tournament has always been a wonderful feeling as it shows me that the hard work that I have put in has paid off, it further motivates me to work harder as I know I will achieve more and more if I keep working harder

I have had a very successful junior golfing career and am very happy about it. Though I have played good golf during the past few years, I know I still have miles to go. I now look forward to play with more competitive players, nationally and internationally. My parents have played a big role in getting me to where I am today. They have always supported me and pushed me so that I could constantly keep improving and play well. My coach has also played a major role in helping me improve my golf by coaching me as to what I should do to keep playing well.

THANK YOU
