

## Man Made Materials

Those materials which are made by men are called man-made materials. Some of them are discussed below:

### ⇒ A. PLASTIC

Plastic is a material that is moldable and so can be molded into solid objects. Mainly there are two types of plastic i.e. thermoplastic and thermosetting. We make many things like basket, toys etc.

### ⇒ B. Synthetic Fibre

Synthetic fibers are man-made fibers most of them are prepared from raw material petroleum. They include nylon, acrylics, rayon's etc. We make umbrella, raincoat etc.
