

## Materials from Animals

We get different type of materials from animals like leather, jute, wool, cotton etc. Also wood is an important material that is obtained from trees and is used to make furniture, ships, house, tools etc. The clothes we wear are also material which is made by cotton and which is a fiber.

We get variety of things from animals:

### ⇒ A. Fiber

It is a thin thread of a natural substance, especially one that is used to make cloth or rope. Fiber consists of the parts of plants or seeds that your body cannot digest. Cotton, jute are an examples of natural fiber.

## Materials from Animals

### ⇒ B. Milk

The milk is obtained from buffaloes and cows directly. Dairy products like ghee, cheese and butter are obtained from milk.

### ⇒ C. Leather, Silk And Wool

All of the above material is used to make clothes and is mostly used in winters to keep the body warm. Leather is obtained from the skin of dead animals while wool is obtained from the hairs of sheep. All these materials are used to make cloth.
