

## Introduction of Subtraction

- 
- We have already learnt about the subtraction of 2-digit and 3-digit numbers without and with borrowing, subtraction facts, checking subtraction with addition and subtraction stories in previous class. Before moving further let's recall it.
  - The answer in subtraction is called **difference**.
  - While doing subtraction, arrange the numbers in the columns of ones, tens and hundreds, first subtract the ones, tens and then the hundreds.
  - When you subtract zero from a number, the difference is the number itself.  **$25 - 0 = 25$**
  - When you subtract 1 from a number, the difference is the predecessor of the number.  **$48 - 1 = 47$**
  - When you subtract a number from itself the difference is **0**.  **$15 - 15 = 0$**
