

Multiplication by 10, 20, 30..... 90

⇒ To multiply any number by 10, just add a 0 to its right.

$$328 \times 10 = 3280$$

$$41 \times 10 = 410$$

To get the product of a number by 20, multiply the number by 2 and place a 0 to its right.

For example: To find the product 6×20 , first multiply 6 and 2 that is 12. Now, place 0 to its right, that is, 120. Therefore, $6 \times 20 = 120$

Apply the same rule with other numbers such as 30, 40, 50, 60, 70, 80 and 90.
