Multiplication Tables

Multiplication Tables

A multiplication table helps us learn and remember multiplication facts. It shows the result of multiplying numbers quickly. Tables are used to add the same number again and again. Learning tables helps us solve sums faster. We start learning tables from 2 to 5 in Class 1.

Examples of Tables

- **Table of 2:** 2, 4, 6, 8, 10, 12, 14, 16, 18, 20
- **Table of 3:** 3, 6, 9, 12, 15, 18, 21, 24, 27, 30
- **Table of 4:** 4, 8, 12, 16, 20, 24, 28, 32, 36, 40
- **Table of 5:** 5, 10, 15, 20, 25, 30, 35, 40, 45, 50

Examples with Solutions

i. What is 2 × 3?

Answer: 6 (From the table of 2: 2, 4, 6)

ii. What is 5 × 4?

Answer: 20 (From the table of 5: 5, 10, 15, 20)

iii. What is 3 × 2?

Answer: 6 (From the table of 3: 3, 6)

iv. What is 4 × 1?

Answer: 4 (First number in the table of 4)

v. What is 2 × 5?

Answer: 10 (From the table of 2: 2, 4, 6, 8, 10)

Summary Points

- Multiplication tables help in quick learning and solving sums
- Tables show results of repeated addition
- Start with tables of 2, 3, 4, and 5
- Practice helps in better memory and faster answers
- Tables make multiplication fun and easy.
