

Time Duration

The time taken to finish an activity is called its duration. Some activities can be completed in minutes and some in hours. If we know the starting time and the finishing time of an activity we can find its duration.

Let us understand with an example:

Example: Shreya left for her office at 8:20 am and reaches at 10 am. How much time did Shreya take to reach her office?

Solution: 1 hour 40 minutes

Time duration = 8:20am \longrightarrow 9:20 am \longrightarrow 10:00 am

= 1 hour + 40 minutes

= 1 hour 40 minutes

Thus, Sheetal takes 1 hour 40 minutes to reach her office.
