

Problem on Subtraction

Example 1: the sum of two numbers is 245892. If one of them is 183681, find the other number.

Solution: Sum of two numbers = 245892

One number = 183681

Other number = $245892 - 183681$

= 62211

Hence, the other number is **62211**.

Example 2: There are 90981 bags of wheat in a godown. If 24579 bags are taken out, how many bags of wheat remain in the godown?

Solution: Total bags in godown = 90981 bags

Bags are taken out = 24579 bags

Bags remain in godown = $90981 - 24579$ bags

= 66402 bags

Hence, **66402** bags of wheat are remaining.

Problem on Subtraction

Example 3: Price of car in the year 2008 was rs.459645. It's price in the year 2009 was increased by rs.64795. But, it's price in the year 2010 was reduced by rs.45608. Find price of the car in the year 2010.

Solution:

Price of the car in the year 2008 = Rs. 459645

Price of the car in the year 2009 = Rs. 459645 + Rs. 64795 = Rs. 524440

Now, price of the car in the year 2010 = Rs.524440 - Rs. 45608 = Rs.488832

Hence, price of the car in the year 2010 is Rs. 478832.
