

Multiples

The multiples of a number are the product or answers we get in the multiplication table of that numbers.

For example: Consider the table of 2.

$$2 \times 1 = 2 \quad 2 \times 2 = 4 \quad 2 \times 3 = 6 \quad 2 \times 4 = 8 \quad 2 \times 5 = 10$$

$$2 \times 6 = 12 \quad 2 \times 7 = 14 \quad 2 \times 8 = 16 \quad 2 \times 9 = 18 \quad 2 \times 10 = 20$$

So, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20 and so on are multiple of 2.
