Addition of Decimals

➡ **For addition of decimals, we have to follow these steps:**

Step 1: Change the given decimal into like decimals.

Step 2: Write the numbers in columns, so that decimal points should come in one column.

Step 3: Now, add the decimals just as we add the whole numbers.

Step 4: Put the decimal in the sum directly under the decimal points of all the decimals.

➡ **Let us understand with an example:**

Example: Add 7.086, 12 and 17.24.

Solution: Converting into like decimals

7.086 = 7.086

12 = 12.000

17.2 = 17.240

	7.	086
	12.	000
+	17.	240
	36.	**240**

Hence, 7.086 + 12 + 17.240 = 36.240
