

Introduction Of Sources Of Clothes

Clothes

We wear clothes to protect our bodies from cold, rain and other climate change or weather conditions. According to the weather, places and occasions, we wear different types of clothes.

Early man wore animal skin and tree leaves to cover his body. Now-a-days we wear clothes made of different fabrics.

Traditional materials such as cotton, linen and leather are still sourced from plants and animals. But most clothes are more likely to be made of materials and chemicals derived from fossil fuel-based crude oil.

The raw materials required to make clothes are obtained from plants and animals. Cotton, jute, linen coir are obtained from the plants. We obtain wool, silk etc from the animals. Silk and wool Clothes are made of different fibers.
