

Limbs

We have two pairs of limbs: the fore-limbs and the hind-limbs.

- A. Fore-limbs are commonly known as the arms and hind-limbs are known as legs.
- B. These limbs are joined with two types of girdles.
- C. Arms are joined with the shoulder girdle and the legs are joined with the hip girdle.
- D. Hip girdle consists of femur bone which fits in it with the help of ball and socket joint.
- E. Femur bone is hollow from inside and is filled with bone marrow.
- F. Hip bones are very strong and carry the whole weight of the body.
