

Addition of Large Numbers

To find the sum of large numbers,

- Arrange the addends in columns.
- Start adding from the ones column and move to the tens, and so on.
- Regroup wherever necessary.

Let us understand with some examples:

Example 1: Add 25, 65, 73, 528 and 43, 27, 59, 541.

Solution:-

	TC	C	TL	L	TTH	TH	H	T	O
	2	5	6	5	7	3	5	2	8
+	4	3	2	7	5	9	5	4	1
	6	8	9	3	3	3	0	6	9

Example 2: A survey shows the population figures of West Bengal and Tamil Nadu are 9, 13, 47, 736 and 7, 21, 38, 958. Find the total population of the two states.

Solution:-

	C	TL	L	TTH	TH	H	T	O
	9	1	3	4	7	7	3	6
+	7	2	1	3	8	9	5	8
	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>	<hr/>
	1 6	3	4	8	6	6	9	4
