

Border Strip and Tiling (Field) Pattern

Sometimes we find repetition of simple geometrical figures on floor, wall, carpet, clothes etc. These figures make beautiful patterns on them.

These patterns can be broadly classified in two types:

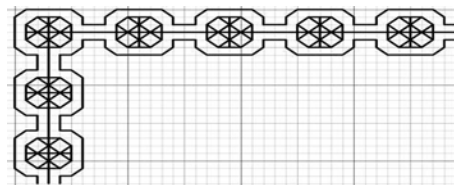

1. Border Pattern: When symmetrical repetition takes place in one direction it makes Border Patterns.

2. Tiling (field) Pattern: When symmetrical repetition takes place in two direction it makes Tiling (field) Pattern.

Let us see some examples:

Border Pattern

Tiling Field Pattern
