

## Ascending and Descending Order

**Ascending Order-** Ascending order means the smallest or first or earliest in the order will appear at the top of the list.

**Let's understand with some examples:**

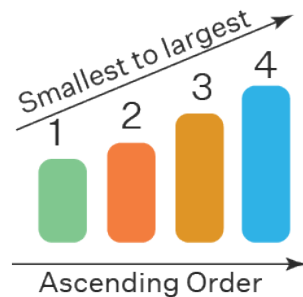

Arrange the following in Ascending Order:

(i) 119, 3496, 777, 920

$$119 < 777 < 920 < 3496$$

(ii) 1149, 2348, 126, 95

$$95 < 126 < 1149 < 2348$$

**Descending Order-** Descending order means the largest or last in the order will appear at the top of the list.

**Let's understand with some examples:**

Arrange the following in Descending Order:

(i) 875, 5964, 295, 398

$$5964 > 875 > 398 > 295$$

(ii) 2319, 2391, 3219, 3291

$$3291 > 3219 > 2391 > 2319$$
