# The Number Line

👉 Numbers on a line is called the representation of whole numbers on number line.

The number line also helps us to compare two whole numbers, i.e., to decide which of the two given whole numbers is greater or smaller.

In order to represent whole numbers on a number line, we draw a straight line and mark a point O on it.

Starting from O, mark points A, B, C, D, E, F, G, H, etc. on the line at equal distances to the right of O.

⟹ **Let's understand with an example:**

Represent the whole numbers 3, 9 and 13 on the same number line.
