

Food Eaten Living Organisms

Animals can be classified into three groups on the basis of their food habits.

Herbivores:

Carnivores

Omnivores

Herbivores

Those animals that eat only plant or plants products. We call them herbivores. For example, Cow, goat, deer, rabbit, elephant, sheep, etc.

Carnivores

Those animals that only eat the flesh of other animals are called carnivores. For example, Lion, tiger, wolf, eagle, etc.

Food Eaten Living Organisms

Omnivores

Those animals that eat both plant and flesh of other animals. We call them omnivores. For Example, Human, cat, dog, cockroaches, crows, etc.
