

Garbage Disposal

Meaning of Disposal of garbage is 'to get rid of garbage'. There are different methods of disposal of garbage. The method to be used depends on the nature of garbage.

Some of the important methods (or modes) of garbage disposal are:

- Composting
- Vermicomposting
- Recycling,
- Reuse
- Landfill

Components of Garbage

(A) Useful Components

Those things present in the garbage which can be converted into useful products, recycled or reused are called useful components. For example, Fruits and vegetable peels, left-over cooked food, fallen leaves, used paper, some plastics, metals, glass, etc.

Garbage Disposal

(B) Non-Useful Components

Those things present in the garbage which cannot be converted into useful products, recycled, or reused are called non-useful components.
