

Classification of Changes

There are different types of changes observed in nature that occurs around us. Some changes take place very quickly while others take hours, days or even years. Some changes are temporary while some others are permanent. Some changes produce new substances while others do not. Some changes are natural while others are made by human beings. Some changes are desirable to us but some changes are not desirable.

We shall now try to classify changes on the basis of certain.

- Slow and fast
- Desirable and undesirable
- Natural and man – made
