

Patterns

Explanation:

- Patterns are things or shapes arranged in a special order.
- They repeat again and again in the same way.
- Patterns help us guess what comes next.

Examples with Solutions:

1. **Shape Pattern:** ● ● ● ● __?

Solution: ● (Red circle repeats)

2. **Number Pattern:** 1, 2, 1, 2, __?

Solution: 1 (Numbers repeat)

3. **Letter Pattern:** A, B, A, B, __?

Solution: A (Letters repeat)

4. **Object Pattern:** 🍎 🍌 🍎 🍌 __?

Solution: 🍎 (Apple repeats)

5. **Color Pattern:** ■ ■ ■ ■ __?

Solution: ■ (Red square repeats)

Summary Points:

- Patterns are things that repeat.
- They help us know what comes next.
- Patterns can be shapes, colors, numbers, letters, or objects.
- Learning patterns helps us think and solve problems easily.
