

Numbers and Numerals

Understanding the Topic

Numbers are written in words. Numerals are written in digits. Every number word has a matching numeral. We use place value (hundreds, tens, and ones) to write numerals. Knowing both numbers and numerals helps us read, write, and understand numbers correctly

How to Write Numbers and Numerals

Step 1: Read the number in words

Step 2: Break it into hundreds, tens, and ones

Step 3: Write the matching digits to form the numeral

Step 4: Check the place value to make sure it is correct

Examples with Solutions

Example 1:

Number: One hundred twenty

Solution: 120

Answer: Numeral is 120

Example 2:

Number: Two hundred thirty-five

Solution: 235

Answer: Numeral is 235

Example 3:

Number: Four hundred eight

Solution: 408

Answer: Numeral is 408

Example 4:

Number: Seven hundred ninety

Solution: 790

Answer: Numeral is 790

Example 5:

Number: Nine hundred ninety-nine

Solution: 999

Answer: Numeral is 999

Summary Points

- Numbers are written in words, numerals are written using digits.
 - Place value helps in converting number words to numerals.
 - Always read the number carefully and write it correctly in digits.
 - Practice helps in understanding numbers and numerals easily.
 - Knowing both forms is important for reading, writing, and solving math problems.
-
