CELESTIAL OBJECT & GALAXIES

CELESTIAL OBJECTS:

Objects, such as the stars, the planets, the moon and many other objects, in the sky are called celestial objects.

Galaxies

Galaxies are large groups of stars held together by gravity. The sun and the [solar system](#) are a part of a galaxy known as the Milky Way. Other galaxies are usually so far away that they look like stars in the night sky. The Andromeda galaxy and the Large Magellanic Cloud are galaxies that can be seen with the naked eye on a clear night.
