Zero

👉 **Zero** is a number with **no** value. It means none or nothing or empty.

It looks like this:

Look at the example:

➡️ Rahul has 5 chocolates with him, he gave all 5 chocolates to his sister, then how many chocolates are left with him?

So, **5 – 5 = 0** Rahul has nil chocolates with him.

Suppose if there are 3 parrots in a cage and all of them are flew away, then how many parrots are there in the cage?

The cage is empty no parrot are there in the cage.
