

## Day Time Sky

### What is the Day Time Sky?

The sky we see during the day is called the daytime sky.

It looks bright and blue because of sunlight.

### What Do We See in the Day Time Sky?

#### The Sun

- The sun shines brightly in the sky.
- It gives us light and heat.
- The sun rises in the east and sets in the west.

#### Clouds

- Clouds are white or grey and float in the sky.
- Clouds bring rain.
- Sometimes they cover the sun.

#### Rainbow

- After rain, when the sunlight passes through water drops, we see a rainbow.
- A rainbow has 7 beautiful colours.

#### Birds and Aeroplanes

- We can see birds flying in the sky.
- We may also see aeroplanes flying high in the daytime sky.

#### Kites

- On windy days, children fly kites in the clear sky.

**Quick Recap Chart:**

| Thing in Daytime Sky | What It Does                   |
|----------------------|--------------------------------|
| Sun                  | Gives light and heat           |
| Clouds               | Bring rain, float in sky       |
| Rainbow              | Seen after rain, colourful     |
| Birds                | Fly across the sky             |
| Aeroplanes           | Fly people from place to place |
| Kites                | Flown by children for fun      |
