

## Parts of plants

Plants have many parts. Each part has a special job to help the plant grow and stay healthy.

### Main Parts of a Plant:

#### i. Root (Under the ground)

- Grows below the soil
- Holds the plant in the soil
- Takes water and nutrients from the soil

#### ii. Stem (Above the ground)

- Stands upright and supports the plant
- Carries water and food to all parts of the plant

#### iii. Leaves

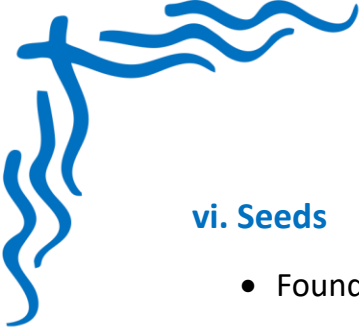

- Are green and flat
- Make food for the plant using sunlight
- Help the plant breathe

#### iv. Flowers

- Are the beautiful part of the plant
- Grow into fruits
- Attract bees and butterflies

#### v. Fruits

- Grow from flowers
- Have seeds inside them
- We eat many fruits like mango, apple, banana

## vi. Seeds

- Found inside fruits
- Grow into new plants
